

The image shows the beta Pictoris system. At the center is the star beta Pictoris, marked with a white dot and a line. To its upper left and lower right are two large, glowing dust disks, each labeled "dust disk". The disks are elongated and oriented in different directions. Three stars are labeled: 'b' is a small orange dot above the star, and 'c' is a small orange dot to the right of the star. The background is dark with some faint, diffuse light.
